

V120 CNC

Second-hand Voumard machinery

► Production grinding machine for simultaneous inner and outer grinding.

CUSTOMIZED SPECIAL MACHINES

DESCRIPTION

- Production machine for simultaneous inner and outer grinding.
- Inner grinding unit with inclining X axis at the outer grinding wheel angle to reduce overhang.
- Outer grinding unit with $\varnothing 600$ mm grinding wheel.

Actuation

- Each program allows for a maximum of nine sequences, for both inner and outer grinding.

5 sequences of diameter sequences.
3 sequences of front faces grinding.
1 sequence of back faces grinding.

DESCRIPTION

- Interpolation of X/Z and XE/ZE axes to grind profiles or tapers.
- Programming in conversational mode with graphics, chance to integrate ISO programming windows.

Automatic loading and unloading

- Conveyor belts for automatic entrance and exit of parts.
- CNC gantry for feeding and unloading of parts.
