

BL-700

Grinding wheel lathe

▶ Grinding wheel lathe to machine inner and outer parts, as well as faces.

CUSTOMIZED SPECIAL MACHINES

DESCRIPTION

- ▶ Specially designed tool to machine grinding wheels (inner and outer parts, as well as faces).
- ▶ Grinding wheel size: up to $\varnothing 700$ mm and 305 mm long.
- ▶ 12-position toolholder.
- ▶ Dust removal system via aspiration to eliminate machining-generated dust.
- ▶ Heat-resistant electronic cards in order to avoid the deterioration caused by sulphur, usual in grinding wheels.
- ▶ Pressurized electrical enclosure and control panel in order to prevent the entrance of foreign matter.
- ▶ Refrigerated electrical enclosure.
- ▶ Rails are specially protected to prevent the entrance of abrasive grit generated in machining processes.
- ▶ Lubrication with air-oil to create a pressurization effect.
