

BFW-30/2

## Friction spin welding machine

► Friction spin welding machine with two stations.

**CUSTOMIZED SPECIAL MACHINES**

### DESCRIPTION

- Thrust: 30 T.
- Additional turning option to remove burr.
- Measurement of arc between welded parts with laser.
- Different feed and discharge options: robot or gantry.
- Traceability control of welded parts.
- Process data control and acquisition in 0.001 seconds.
- Programmer with total control of all the process-specific parameters.
- Display with charts to control the process.
- Special controller for welding machines, BSC (Berkoa System Control).
- We teach courses on friction welding.
